Attachments: Pratt PAH Mixtures_SOT 2016 Abstract.docx

Dear all,

Attached is a draft abstract for submission to 2016 SOT entitled "Advancing the State-of-the-Science in Estimating Cancer Risk of Polycyclic Aromatic Hydrocarbon Mixtures". It has already received divisional clearance in IRIS.

Please review and let me know if you have comments or suggestions. You may receive an out-of-office message when replying to my email, but I will be checking periodically while I am out of the office over the next two weeks to make sure this keeps moving.

Note that the SOT submission deadline is October 7.

Thanks very much!
Margaret

Subject: SOT abstract - PAH RPF

Andrew and Gina,

Attached is an abstract for submission to SOT 2016. Lynn said to initially send this out to both of you for review. Once I receive a final OK, I will send it to SRC for their review and will prepare to upload it into STICS or otherwise direct it as instructed.

Again, please note that today is my last day in the office until October 1, however, if needed, I will keep tabs on this while I'm away to make sure it keeps moving.

Thanks!
Margaret
